Profile Summary

Bachelor of Information and Communication Technology (Honours) undergraduate at Uva Wellassa University of Sri Lanka. Aspiring Full Stack Developer with hands-on experience in developing web and desktop applications through university group projects. Strong foundation in frontend and backend development, databases, REST APIs, and collaborative development using Git and GitHub. Actively using LinkedIn and GitHub, eager to contribute to real-world software projects, learn industry best practices, and grow as a professional full-stack developer.

Education

Bachelor of Information and Communication Technology (Honours) Degree

Uva Wellassa University of Sri Lanka

November 2023 - Present

GCE Advanced Level (Engineering Technology Stream)

B/Dharmashoka Central College (Bandarawela)

2018 - 2021

Technical Skills

Programming Languages: Python , Java , C , JavaScript

Web Technologies: HTML5 , CSS3 , JavaScript , React , Node.js (Basic)

Databases: MySQL , SQLite , MongoDB

Backend & DevOps Tools: Node.js (Basic) , AWS (Basic) , Docker (Fundamentals) , Git , GitHub , REST APIs

Tools: VS Code , Linux , Postman

Projects

AI-POWERED FINANCIAL FRAUD DETECTION SYSTEM

November 2025 - Present

Developed an AI-powered financial fraud detection system with real-time transaction analysis and REST API integration. Implemented a FastAPI backend with machine learning support, PostgreSQL , and Redis for data management, a React dashboard for visualization, and Docker-based containerized deployment.

Role: Fullstack Developer

Technologies: FastAPI, Python , React 18, PostgreSQL , REST APIs, Docker, Git

Project Link: [gitHubrepository](#)

BOOLEAN LOGIC SOLVER SOFTWARE & DIGITAL HARDWARE SIMULATOR

Jun 2025 - Sep 2025

Developed a desktop application to simplify Boolean expressions and simulate digital logic circuits, including real hardware like logic gate simulation. Implemented Boolean simplification techniques, truth table generation, and interactive circuit behavior to support practical learning.

Role: Fullstack Developer

Technologies: Electron.js, React.js, Python, SQLite, Git

Project Link: [gitHubrepository](#)

UWU FOOD WEB – University Smart Ordering Platform

Nov 2024 - Jul 2025

Developed a web-based food ordering system that connects users with campus food outlets, providing a smooth experience from browsing menus to placing orders and tracking order status.

Role: Full Stack Developer

Technologies: MERN Stack, AWS (Basic), REST APIs, Git

Project Link: [gitHubrepository](#).

MASTER - ART DESIGN WEB PLATFORM

May 2024 - July 2024

Engineered a web-based food ordering system using React, connecting students to campus outlets, resulting in a 15% reduction in order placement time and improved user experience.

Role: Frontend Developer

Technologies: HTML, CSS, JavaScript, React, Git

Project Link: [gitHubrepository](#).

Certifications & Online Learning

Docker - KodeKloud

Python - TRAINEE - FULL STACK DEVELOPER PROGRAMME (UOM)

100 Days of DevOps – KodeKloud (Present)

Soft Skills

Problem Solving

Team Collaboration

Willingness to Learn

Critical Thinking

Communication Skills
